

Individual Contribution Declaration

This **Individual Contribution Statement** asserts that the information that you are providing is an accurate and fair assessment of your group members' contributions.

Assignment: Assignment 4 Group Work: Cloud Computing

Group Name (if applicable):

Student Name: Timothy Finn

FAN / Student number: FINN0066

Student Signature: _____ TFINN _____

Date: 10/30/2017

Group Mark Allocation:

List the members of your group and assign the proportion of effort contributed by each member. **The total of the contribution efforts must add to 100%.** Outrageous values will need to be justified appropriately and you can expect widely varying claims to be checked closely.

FAN	Name	Contribution Effort (%)
<i>FINN0066</i>	<i>Timothy David Finn</i>	100
<i>VUKS0004</i>	<i>Sasa Vuksevic</i>	0
[_] Equal contribution from all members TOTAL		100%

For equal contributions by all team members, list the members names and tick the [_] equal distribution option in the TOTAL line above.

Individual Contribution Support Statement:

In the next page, provide a brief summary of your specific contributions to the group submission, regardless of whether you ticked "equal contributions" or not. ***Note:** In the event of any disputation you will need to be able to provide substantiation of any claims you make – such as through the group journal, group BLOG, or other form of log or diary entry.*

If you have valid reasons for substantially different contribution assessments of your team members, give a brief summary of those reasons. *[This information will remain confidential between you and your tutor or topic coordinator.]*

Individual Contribution Support Statement:

I completed the work on the assignment my team member did not show for the first two weeks of the second semester which forced me to complete the practical component by myself. In Week 11 it was discussed as I had finished the practical component my team member would complete the Report splitting the assignment fairly between each member

50/50. This was agreed, and I then explained what I had done throughout the practical component, so my team member could write the report.

In week 12s tutorial my team member had said that they would finish the report in the next couple of days as I explained further about what I had done so he could finish the report. It was agreed that I would receive a draft by Thursday or Friday morning at the latest to go over. No draft was shown and then my team member sent a message on the Saturday day of the deadline saying that they were unable to do the report at all.

Evidence can be supplied from Slack message that were shared between team members and from attendance slips in tutorials.
