Progress Report for Assignment 4

For the Assignment 4 project my team member was unable to participate in the work, So this assignment was done individually no meetings where called. I started the assignment by first tackling the practical component, then finishing and finalizing the reports.

As the work was completed by one team member tools to keep on top of project management weren't abundant as I knew what tasks needed to be completed I did use Trello to keep on top of the tasks I needed to complete as shown below.
